

Go for the Gold.

Kinedyne products have been the "gold standard" in cargo control for years. That's not a boast, it's a statement of fact. Kinedyne has a reputation as the leader in the cargo control industry because our products meet the highest standards of safety and reliability. We achieve these levels because our straps are made in a Kinedyne facility. Every step in the process, from weaving the yarn into the web to sewing the finished product, is managed by Kinedyne people to meet our standards. Manufacturing and Quality Control is totally our responsibility, not the function of an outside source. And it's a responsibility we take very seriously. We've made considerable investments in our production capabilities, and the result is a consistency in product performance that is simply unequalled. So trust your cargo to Kinedyne. It's the name you can count on.
