

Bag it. Don't drag it. **StrapPak™**

The StrapPak™ by Kinedyne offers a quick and inexpensive way to secure the loose end of your straps.

- Attach to any standard 2" ratchet strap
- Safely secure excess web on ratchet straps up to 30 feet in length
- Can be used on any open-air or enclosed trailer or utility truck

You will never again have to use duct tape or cable ties to secure the loose end of your straps. The StrapPak™ also serves as a convenient storage solution for your strap when it is not in use.

For more information or to place an order, please contact Kinedyne customer service at 1-800-848-6057 or visit www.kinedyne.com.

KINEDYNE®
The Cargo Control People!

PROBLEM

SOLUTION

In addition to the Aftermarket version for installation on straps already in service, the StrapPak™ is also available in a fully Assembled version. It can be ordered on any standard or stenciled two inch ratchet strap assembly with a variety of end fittings.

OPERATING INSTRUCTIONS

Operation of StrapPak™ to Secure Loose End of Strap Assembly

1. Secure cargo as per federal, state or provincial standards
2. Open ratchet to approximately 120° angle (Figure #1)
3. Starting with free end of strap fold over approximately 6" of material and continue folding excess web to create a flat loop as shown (Figure #2)
4. Insert flat loop of web material into open end of StrapPak™ as shown (Figure #3)
5. Close the ratchet handle. Top of bag will remain secure when held in place by ratchet handle in fully closed position (Figure #4).

Notice:

- Operator may use hook end facing either up or down depending on application
- StrapPak™ for use with 2" ratchet straps with 12" minimum fixed end web length
